

Lead Web Developer

Museum of London

The Museum of London is looking for a driven and experienced Web Developer to take the lead on developing the museum's web applications and content management systems.

Working as part of our Web Team, you will be responsible for ensuring a seamless web experience is provided for users across a number of underlying web platforms and managed services that deliver digital content to our visitors on the web and mobile devices. You will be responsible for ensuring technical consistency and best practice, developing and integrating new enhancements and keeping up to date with evolving web standards and accessibility.

You will have knowledge and exposure to PHP, JavaScript, MySQL, and specific Content Management Systems such as Wordpress and SharePoint. Although not essential, any additional experience in HTML5, CSS3, ASP.NET, C#, SQL Server, and Concrete5 would be desirable.

The successful candidate will have a strong development background with experience in front-end development, creation and deployment on a number of platforms with experience in fault diagnosis and rectification. Experience in managing multiple web and application servers will be an advantage. The ability to effectively work with designers, developers and Museum staff using clear and friendly communication skills are vital to this role.

The closing date for applications is 09 June 2013 at 17:00. Interviews will be held on 20 June 2013.

The Museum of London is committed to equal opportunities and diversity.
