The Science Museum is offering a unique and highly desirable opportunity for a motivated individual to develop high-quality and engaging exhibition content for a major temporary exhibition on the Large Hadron Collider at CERN, opening at the Science Museum in November 2013.

This is an exciting opportunity to contribute directly to the Museum’s creative offerings. The exhibition will feature a range of innovative interpretation methods, centred around objects from CERN and from the Science Museum’s historic collection. It will be supported by an online presence and live events.

This role will be offered on a 6-month fixed-term contract.

The following ought to be a part of your background:

i) A proven record in communicating science and technology - ideally through exhibitions, or through print, multimedia, or live events - for a general audience.

ii) Excellent written communications skills, especially the ability to communicate complex content in an engaging way.

iii) A good knowledge of physics, for instance to a level equivalent to a bachelor’s degree in a STEM subject.

iv) Knowledge of a range of interpretive methods.

Location: Science Museum, South Kensington
Category: Exhibitions
Duration: Contract
Hours: Full Time
added: April 25, 2013
deadline: May 6, 2013
